

WEIGHT MANAGEMENT AWARENESS

Pet Obesity reports show that more and more of North America's pets are becoming overweight.

At Mill Creek Animal Hospital, we want to make owners aware of a serious health concern for pets – obesity. Over 50% of pets are currently overweight. Obesity can make your pet more prone to heart disease, diabetes, arthritis, liver issues and respiratory conditions. But there are steps you can take to manage your pet's weight!

We are inviting all pet owners to participate in our Weight Management campaign this July and August, even if your pet is already a healthy weight. We want to spread the word about the importance of proper nutrition, exercise and how to help your pet live a longer, healthier life. Campaign details below!

HOW CAN MILL CREEK HELP YOUR PETS?

Nutritional Consults: Call or stop by Reception to set up your consult today. A Technician will meet with you to weigh and give your pet a body condition score and set a target weight if need be. They will advise you on diet choices, feeding amounts, exercise periods and healthy treat choices. *Every pet will receive a special take home package!*

Monthly Weigh-Ins: We are here to support you every step of the way! Once a month we would like to see your pet back in for a complimentary weight check and an adjustment of feeding amounts. We will talk about your pet's progress and provide you with a chart of their weight so we can track progress!

Guaranteed Diets: We believe in the diets we recommend! Because of this, we are happy to provide you our guarantee. Any food you purchase from us can be returned for 100% money back – even if it has been opened, no matter the reason. At North Town, we stand behind every recommendation that we make!

Give us a call to set up your Nutritional Consult and receive your pet's special take home package! For more information on Weight Management visit our website at www.millcreekvet.com or our Facebook page at
